Keys

Service account keys could pose a security risk if compromised. We recommend that you avoid downloading service account keys and instead use the [Workload Identity Federation](#). You can learn more about the best way to authenticate service accounts on Google Cloud [here](#).

Add a new key pair or upload a public key certificate from an existing key pair.

Block service account key creation using [organisation policies](#).
[Learn more about setting organisation policies for service accounts](#)

Person job

The screenshot displays a data pipeline execution interface. At the top, a flow diagram shows a sequence of tasks: 'Persons' (input), 'tMap_1' (transform), and 'Persons' (output). The flow is labeled with '5107197 rows in 249.18s' and '5107197 rows in 249.79s'. Below the flow, a task log window is open, showing the execution details for the 'Persons' task.

Task Log Window:

- Execution controls: Run, Kill, Clear
- Log content:

```
Starting job Persons at 04:29 06/08/2023.  
[statistics] connecting to socket on port 4014  
[statistics] connected  
[statistics] disconnected  
  
Job Persons ended at 04:34 06/08/2023. [Exit code = 0]
```

Crashes job with bigQuery

The image shows a workflow diagram and its execution log. The workflow consists of three components: **tBigQueryInput_1**, **tMap_1**, and **Stage_NYC_Crash**. The data flow is as follows:

- tBigQueryInput_1** outputs 2014469 rows in 1734.31s at a rate of 1161.54 rows/s (Main).
- tMap_1** receives the input and outputs 2014469 rows in 1738.08s at a rate of 1159.02 rows/s (Main).
- Stage_NYC_Crash** receives the output from **tMap_1**.

The execution log shows the following details:

```
Workflow 0.1 | Contexts(Crash_Workflow) | Component | Run (Job Crash_Workflow) | Cloud Artifact
```

Workflow

Execution

Run Kill Clear

Starting job Crash_Workflow at 03:15 06/08/2023.
[statistics] connecting to socket on port 3517
[statistics] connected
[statistics] disconnected
Job Crash_Workflow ended at 03:44 06/08/2023. [Exit code = 0]

Vehicles job

The workflow diagram shows a sequence of three components: 'Vehicles', 'tMap_1', and 'tDBOutput_1'. The 'Vehicles' component outputs 3704406 rows in 526.22s at a rate of 7039.71 rows/s. This data is then processed by 'tMap_1', which outputs 3704406 rows in 528.81s at a rate of 7005.23 rows/s. Finally, the data is written to 'tDBOutput_1'. The background of the diagram is a light gray checkerboard pattern.

Code

Vehicles_Workflow 0.1 Contexts(Vehicles_Workflow) Component Run (Job Vehicles_Workflow) Cloud Artifact

Vehicles_Workflow

Execution

Run Kill Clear

```
Starting job Vehicles_Workflow at 03:24 06/08/2023.
